### **DETAILED ACTION**

1. Claims 1-14 and 16-21 are pending in this Application.
2. Examiner apologizes for not shortening the prosecution of the case due to new directives regarding a non-statutory issue as indicated below.
3. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 15, 2008 has been entered.

### ***Claim Rejections - 35 USC § 101***

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1-10 are not tied to another statutory class (such as a particular apparatus), nor does claims 1-10 transform underlying subject matter (such as an article or material) to a different state or thing. Thus, claims 1-10 are directed to non-statutory subject matter.

Art Unit: 2611

5. The examiner would like to suggest, since the instant specification seems to teach the Viterbi detector, the problem as shown above may be cured by amending the claims to recite at least some of the disclosed elements that perform the steps.

6. The claimed subject matter in claim 5, which was previously rejected, is interpreted in light of figures 5A-5C and the related disclosed subject matter in the specification, i.e., the determined symbol value of the previous symbol (see for example symbol values 10 in fig. 5A), and generating the reduced trellis by calculating only the path metrics for the states in which the previous symbol has the determined symbol value (see the bit value 0 in fig. 5B and bit values of 0's in figure 5C used in generating the reduced Trellis). Therefore, the art rejection to claim 5 is withdrawn in light of the above analysis.

### ***Allowable Subject Matter***

7. Claims 11-14 and 16-21 are allowed.
